

## CLAIMS

I claim:

- 1        1. A computer desk, comprising:
  - 2            (a) a cross-member and a pair of legs extending from opposite
  - 3            ends of the cross-member, defining a U-shaped base;
  - 4            (b) a pair of vertical support posts extending from the legs
  - 5            adjacent the cross-member, the legs being normal to a plane
  - 6            defined by the U-shaped base;
  - 7            (c) cross-beam and a pair of arms extending from opposite
  - 8            ends of the cross-beam, defining a desk frame, the arms being
  - 9            mounted on top of the vertical post adjacent the cross-beam, so
  - 10          that the arms of the desk frame extend substantially parallel to
  - 11          and above the legs of the base;
  - 12          (d) a desktop having a top surface and a bottom surface, and
  - 13          a pair of parallel rails disposed on the bottom surface, the top
  - 14          surface being adapted for supporting computer equipment; and
  - 15          (e) a sliding track assembly disposed between the rails and
  - 16          the arms of the desk frame, whereby the desktop is slid able
  - 17          between a retracted position and an extended position in order to
  - 18          draw the entire desktop towards a user's chair.

1       2.     The computer desk according to claim 1, further  
2 comprising:

3           a keyboard tray track attached to the bottom surface of said  
4 desktop;

5           a connecting arm slidable on the keyboard tray track; and

6           a keyboard tray attached to the connecting arm;

7       wherein the keyboard tray is slidably between a retracted position  
8 disposed beneath said desktop, and an extended position in front  
9 of said desktop.

1       3.     The computer desk according to claim 1, further  
2 comprising two pairs of diagonal braces, one of the two pairs  
3 being disposed on opposite sides of the base, respectively, each  
4 brace pair having a T-configuration and being attached to an arm,  
5 a leg, and a vertical post in order to rigidly support the arms.
